I've come across the Enbridge application for their Northern Gateway Project through a CBC article. I am vehemently opposed to this project. Great Bear Rainforest must be protected against this kind of development. After all the problem in the Gulf, we cannot risk allowing this happen to this pristine area. In this day in age, we should be supporting projects that move us away from oil and gas dependency. We possess the technology and skills to move away from oil and gas, we just need political backing. Please do not allow this project to go through.
Thank you,
