August 22, 2012

Mr. Albert Sweetnam
Executive Vice President
Deep Geologic Repository Project
Ontario Power Generation
700 University Avenue
Toronto, Ontario M5G 1X6

Subject: POSTPONEMENT of the Modelling Technical Information Session on Environmental Impact Statement and Licence Application for the Deep Geologic Repository Project

Dear Mr. Sweetnam:

Please find enclosed a Public Notice announcing the postponement of the Joint Review Panel’s modelling technical information session that was originally scheduled for September 6, 2012. The Panel does not anticipate a lengthy postponement, and will advise you as soon as it has rescheduled the session.

Given the number and relative complexity of the models to be considered at the modelling technical information session, the Panel has determined that it requires additional time to consider the existing information as well as the written documentation, including presentation materials that Ontario Power Generation is preparing for the session. The Panel therefore requests that Ontario Power Generation retains its deadline of August 27, 2012, to provide the session documentation to the Panel.

If you have any questions concerning the modelling technical information session or the postponement, please contact either of the Panel Co-Managers for the project. Kelly McGee may be reached at (613) 947-3710 and Debra Myles may be reached at (613) 957-0626.

Yours truly,

<Original signed by>

Dr. Stella Swanson
Chair, Joint Review Panel

cc. Dr. James F. Archibald, Joint Review Panel Member
    Dr. Gunter Muecke, Joint Review Panel Member
    Frank King, Nuclear Waste Management Organization
    Allan Webster, Ontario Power Generation
