**Subject:** RE: \*\*\*Clarification Required - MNO April 4th questions to GenPGM

**Sensitivity:** Normal

---

Good morning Jason,

Yes, please post the question as we need it answered from one or all of these bodies. We also require a very specific answer with properly referenced documentation. Perhaps this was one of the incorreced referenced documents by GenPGM but we therefore cannot find it.

Much appreciated,

**Victoria Stinson**

Manager

Good morning Dr. Stinson,

Thank you for sharing your concerns with the response to your question. We can post your email to the public registry for consideration by GenPGM, Health Canada, NRCAN, or MNDMNRF, but unfortunately the Panel and Secretariat are unable to answer a question like this. Please let me know if you would like your email posted.

Thank you,  
Jason

**Subject:** \*\*\*Clarification Required - MNO April 4th questions to GenPGM  
**Importance:** High

Good afternoon Panel,

One important question posed by myself on April 4<sup>th</sup> in the Indigenous Community session remains unanswered.

The original question can be found in the transcripts for April 4<sup>th</sup> on Page 2645, Lines 17-25 and Page 2646 Lines 1-3. To be even more clear, my outstanding question is as follows:

***“What varieties of serpentine are present at the mine site and in what habit are they present? Please provide the study that has determined this.”***

The response by GenPGM’s COO did not answer this question and his response is located on Page 2734, Lines 12-13. His response lacks specificity results in the Métis Nation of Ontario still not understanding if the waste rock and ore has potential for long-term affects from asbestosis or other lung diseases in humans and other organisms.

The Métis Nation of Ontario requests this outstanding question is answered and documentation is provided by either **GenPGM, Health Canada, NRCan, or MNDMNRF.**

Thank you and marsi,

**Victoria Stinson**
