Dear Ms. Nelson

Re: Environmental Assessment of the Schaft Creek Project

Teck continues to work on the Schaft Creek Project. However, we recognize that substantive changes will be required to the project description to address, at a minimum, issues related to tailings management and greenhouse gas emissions as required by the CEAA and the BC EAO. Teck is not ready at this time to advance the environmental review of the Project and hereby withdraws from the current federal review. Teck will contact the CEAA when the Project is ready to re-enter the process.

Thank you for your kind consideration.

Sincerely

<Original signed by>

Warren Yau, P.Eng.
Project Director
Schaft Creek Project
