MNRF-10B	Socio economics (fish)		<p>MNR requests more information on the 'no fishing policy' that Canadian Malarctic plans to implement. Has the policy been prepared? ...how will this policy be enforced? Will this policy only pertain to Marmion Lake (upper, lower or both?) Or will the policy extend to nearby lakes too? Is the suggested questionnaire for workers who are not staying at camp, or for all workers who may be fishing in the evenings on other lakes?</p> <p>MNRF appreciates the acknowledgment there is potential for impacts to the fishery. This needs to be included in the TDS documents.</p> <p>In order to capture the changes and impacts to existing anglers and resource based tourism, MNRF continues to suggest that CMC conduct angling effort surveys on the Marmion system, at minimum, to better understand the social-economic impacts that will be caused by the start-up of their operations.</p> <p>Regarding the restriction to access commonly used public fishing areas, it should be clarified what this means. That is, if it understood the public continue to have access to leased mine lands (which is a large portion of the LSA). Case in point – the launch site at the current camp location is no longer accessible to the public. There needs to be a clear understanding of what public access will or will not be restricted.</p>	<p>The formal 'No Fishing/Hunting Policy' will be prepared prior to construction. The general framework upon which the policy will be developed is provided as follows: CMC will prohibit recreational fishing and hunting at the Project site for public and employee safety. Recreational fishing tackle and poles and firearms, ammunition and knives will be prohibited items at the Project site (including parking areas). All visitors and employees will be subject to security screening for prohibited items when entering or leaving the Project site. A commitment to develop and enforce a no hunting and fishing policy is included in the Project commitments registry.</p> <p>CMC does not have the authority to prohibit employees from exercising their recreational rights when outside of the Project site.</p> <p>CMC will implement a bi-annual fishing and hunting effort survey of all site employees as part of an approved Project monitoring program to evaluate effect predictions. The design of the survey will be reviewed with MNRF following Project approval. A commitment to conduct bi-annual hunting and fishing survey is included in the Project commitments registry.</p> <p>In response to comments from the MNRF, CMC has completed a more detailed assessment of the potential impacts of a 1,200 person camp on fishing and hunting pressure and opportunities in the Local and Regional study areas. The results of this assessment, including sources of baseline data, are provided in the attached memorandum.</p>	<p>MNRF requests the survey results and raw survey data be provided to MNRF within one month of the survey.</p> <p>MNRF requests clarity on the location of the security check for adherence to the CMC policy. MNRF requests clarity on how CMC will enforce compliance with their fishing and hunting policies.</p>	<p>MC will provide the results of the bi-annual fishing and hunting effort survey to the MNRF within one month of completion of the survey.</p> <p>CMC will manage access to the accommodation camp and active mining area through a controlled entry point (e.g., security gate/check-point). Employees and visitors will be subject to a security screening process at this location to ensure compliance with CMC health, safety and security policies. Employees found to be in violation of CMC policies will be subject to disciplinary actions, including potential termination of employment.</p>	N/A
