
HAMMOND REEF GOLD PROJECT RESPONSE TO COMMENTS ON FINAL EIS/EA

COMMENT – A-2

Source: Canadian Environmental Assessment Agency

Summary of Comment

The referenced draft document for noise assessment (HC, 2005) is outdated and no longer supported by HC. Refer to HC's Useful Information for Environmental Assessments (HC, 2010) for more current information on noise assessment.

Proposed Action

Please acknowledge.

Reference to EIS

Chapter 6, Section 6.1.2.2.1

Response

It is acknowledged that the document referenced as HC, 2005, is considered outdated and that Health Canada's Useful Information for Environmental Assessments contains more current information on noise assessment. However, a review of the updated Health Canada reference has shown that neither; the approach to the evaluation of noise effects on human health or the results of the assessment presented in the Final EIS/EA Report would be changed based on this information.
