Subject: New Prosperity Gold-Copper Mine Project – Review of Proponent’s Responses to Supplemental Information Requests

Dear Mr. Henderson:

The Federal Review Panel (the Panel) for the proposed New Prosperity Gold-Copper Mine Project (the Project) has received the responses to the supplemental information requests (SIRs) issued to Taseko Mines Limited (the Proponent) on March 28, 2013. The responses were received on June 6, 2013 and are available on the project registry at: http://ceaa.gc.ca/050/document-eng.cfm?document=89802.

The Panel is initiating a 10-day public comment period on the responses provided by the Proponent. The Panel is interested in obtaining your department’s views on the adequacy and technical merit of the additional information submitted by the Proponent as measured against the EIS Guidelines. In particular, the Panel requests that TC provide its review of the Proponent’s responses to SIR 51.

The Panel will determine if the EIS is sufficient to proceed to public hearing based on its own review of the additional information and on its review of the comments received. If the Panel determines the EIS, supplemented by the additional information, is insufficient to proceed to public hearing, it will ask the Proponent to provide further information in the necessary areas. If the Panel determines it has sufficient information to proceed to public hearing, a public notice will be issued 30 days before the commencement of the hearing.

The Panel will consider all written comments received by June 16, 2013. Departmental comments can be forwarded by e-mail to NewProsperityReview@ceaa-acee.gc.ca.

Any questions regarding this consultation period may be addressed to Livain Michaud, Panel Manager, at (613) 948-1359, or at NewProsperityReview@ceaa-acee.gc.ca.
Sincerely,

<original signed by>

Bill Ross  
Chair
