To: Pacific Northwest LNG / GNL Pacific Northwest (CEAA/ACEE)

Subject: Protect salmon from LNG

Where is the white man's commitment to honour the Treaties of First Nations? And the government's commitment to lessen climate change?

Once this salmon run is devastated by an LNG plant there's no going back and the First Nations will not be able to live off the land.

Look at the similar situation in Russia.

If Petrona is determined to build an LNG plant, I beg of you to chose a different location.

Please have some integrity and reexamine your motivations for undertaking this project.

Sincerely,

Ardith Beynon
