Subject: LNG public comments

To whom it may concern,

I write to you to express my concern with the proposed LNG project near the Skeena waterway. We have discussed this issue in our natural resources class, and during our discussion it became apparent that the ability of the Skeena to support such a large population of salmon would be impacted by this development. Throughout BC our salmon populations have been having problems except in this waterway. For this reason, I urge you to reconsider. It would be a shame to lose this valuable resource.
