**SUBJECT: James Bay Lithium Mine Project
Response to the Second Information Request**

Gail Amyot:

On October 23, 2021, the Joint Assessment Committee (the Committee) received additional responses from Galaxy Lithium (Canada) regarding the incomplete information identified in the revised Environmental Impact Statement (EIS) for the above-named project. These responses are presented in the following document:

WSP, 2021. James Bay Lithium Mine Project. Additional Answers to the Second Information Request Received from the Impact Assessment Agency of Canada as part of the Environmental Review of the Project. Report produced for Galaxy Lithium (Canada) Inc. 114 pages and appendices.

After reviewing the document, the Committee, in collaboration with the federal authorities involved in the environmental assessment, determined that the additional information provided allows for further analysis. The Committee will advise you in the coming weeks if new information is required to complete the Committee's analysis.

If you require additional information, we invite you to contact the project manager Guillaume Clément-Mathieu by phone at 418-573-2306 or by email at guillaume.clement-mathieu@iaac-aeic-gc.ca.

Yours sincerely.
