Steering Committee	The Regional Assessment Follow-up Program Steering Committee. This committee includes representatives from: IAAC, NRCan, the Government of NL's Department of Industry, Energy and Technology, the C-NLOPB, ECCC and DFO
Study Area	The Regional Assessment Study area as defined in Figure 1.1 of the Regional Assessment of Offshore Oil and Gas Exploratory Drilling East of Newfoundland and Labrador Final Report.

1. Introduction

On April 15, 2019, the Minister of Environment and Climate Change Canada (ECCC) announced the launch of the Regional Assessment of Offshore Oil and Gas Exploratory Drilling East of Newfoundland and Labrador (the Regional Assessment) and the appointment of a Committee to conduct the Regional Assessment (the RA Committee). The purpose of the Regional Assessment was to improve the effectiveness and efficiency of the federal impact assessment process for future offshore exploratory drilling projects in the defined offshore Regional Assessment Study Area (the Study Area) while ensuring the highest standards of environmental protection continue to be applied and maintained.

On February 29, 2020, the RA Committee submitted its [Report on the Regional Assessment of Offshore Oil and Gas Exploratory Drilling East of Newfoundland and Labrador](#). This Report detailed the knowledge gained by the Committee, including its associated analysis and engagement activities, the conclusions reached and the subsequent recommendations.

On June 4, 2020 the [Regulations Respecting Excluded Physical Activities - Newfoundland and Labrador Offshore Exploratory Wells](#), a Ministerial regulation under the *Impact Assessment Act* (IAA) that sets out requirements for future exploratory drilling projects in the Study Area, came into force. Subsequently, the Impact Assessment Agency (IAAC) posted on the Canadian Impact Assessment Registry (the Registry) the [Ministerial Response to the Regional Assessment Committee Report for Offshore Exploratory Drilling East of Newfoundland and Labrador](#) (Ministerial Response). In this document, the Government of Canada and the Government of Newfoundland and Labrador (Government of NL) responded to the recommendations in the Final Report of the RA Committee and committed to establishing a Regional Assessment Follow-up Program (RA Follow-up Program).

The RA Follow-up Program monitors and reports on the implementation and effectiveness of the various outcomes of the Regional Assessment, including commitments made in the associated Ministerial Response. The RA Follow-up Program will also ensure that the information and analysis remain valid and up-to-date, and that it continues to fulfill its intended function of informing decision-making as it pertains to future exploratory drilling and associated activities in the Study Area.

2. Purpose

The purpose of this Regional Assessment Follow-up Program Report is to provide updates on the initiatives and outputs of the RA Follow-up Program for the reporting period of 2024-2025. The Ministerial Response Progress Report (MRPR) included in Section 5 reports on the progress being made on the commitments by the government agencies and departments named in the Ministerial Response. This includes IAAC, Fisheries and Oceans Canada (DFO), ECCC, Natural Resources Canada (NRCan), the Canada-Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB) and the Government of NL. The report also provides an evaluation of the overall effectiveness of the follow-up program (Section 6).

3. Engagement

A public comment period on the draft version of this report took place August 25, 2025 – September 24, 2025. Notice of this opportunity was posted on the Canadian Impact Assessment Agency Registry website. No comments were received.

4. Summary of Activities 2024-2025

In addition to the activities summarized in Section 5, the following activities were carried out under the RA Follow-up Program in the 2024-2025 reporting year:

- The RA Follow-up Advisory Committee¹ met seven times during the 2024-2025 reporting period.
- On June 6, 2024, the RA Follow-up Advisory Committee received a presentation from Cenovus on the results of its Environmental Effects Monitoring (EEM) Program.
- On July 15, 2024, the RA Follow-up Advisory Committee started planning work to make use of EEM results from drilling projects that are relevant to the objectives of the Regional Assessment.
- On January 16/17, 2025, the RA Follow-up Advisory Committee held its first in-person meeting, which included sessions with regulators related to the Ministerial Commitments of the RA and to advance the committees project related to EEM results.

¹ The RA Follow-up Advisory Committee is composed of a variety of interests and areas of expertise, including representatives of Indigenous groups, the fishing industry, oil and gas industry, non-government organizations, and academics.

Table 1 provides an overview of the change of status for the 42 commitments made in the Ministerial Response for the given reporting period. A description of the statuses is included in Table 2.

TABLE 11: COMMITMENT STATUS DASHBOARD FOR THE COMMITMENTS OUTLINED IN THE MINISTERIAL RESPONSE.

Completed – Ongoing Monitoring	12	11	12
Progress Ongoing	16	14	13
On Hold	0	1	1

5. Ministerial Response Progress Report

The Ministerial Response Progress below builds on commitments and work plans identified in the initial 2021 [Ministerial Response Progress Report](#). A summary of changes to commitment status can be found in Table 1. Each commitment has been assigned a status based on the description in Table 2. The commitments in this report follow the format of those outlined in the Ministerial Response. Table 3 below provides an overview of the actions taken, or accomplishments made towards achieving the commitment during the 2024-2025 reporting period.

TABLE 22: STATUS DESCRIPTION TO TRACK THE COMMITMENTS OUTLINED IN THE MINISTERIAL RESPONSE.

Status	Description
Completed – Fully met	Commitment was fully completed. No more actions or monitoring required.
Completed – Ongoing Monitoring	Commitment was completed but ongoing monitoring is required.
Progress Ongoing	Commitment has not been completed but progress has been made, or actions were taken towards achieving the commitment and ensuring it remains on track for completion.
On Hold	Progress on the commitment has paused with a provided rationale.

TABLE 33: UPDATES TO THE MINISTERS COMMITMENTS OUTLINED IN THE MINISTERIAL RESPONSE TO THE RECOMMENDATIONS OF THE REGIONAL ASSESSMENT OF OFFSHORE OIL AND GAS EXPLORATORY DRILLING EAST OF NEWFOUNDLAND AND LABRADOR.

Commitment	Status
<p>1. Mitigation and Follow-up Measures (IAAC)</p> <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
<p>2. Trained Seabird Observers (ECCC)</p> <ul style="list-style-type: none"> ECCC continues to review data collected by trained observers as part of exploratory drilling programs on an ongoing basis. 	Completed – Ongoing Monitoring
<p>3. Fisheries Communications Plans (C-NLOPB & IAAC)</p> <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
<p>4. Pre-drilling Notifications (C-NLOPB & IAAC)</p> <ul style="list-style-type: none"> The list of Stakeholders maintained by the C-NLOPB is updated periodically to ensure that communication reaches all parties in a timely manner. 	Completed – Ongoing Monitoring
<p>5. Migratory Bird Mitigation (IAAC)</p> <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
<p>6. Seabird Monitoring (IAAC)</p> <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
<p>7. Training on Seabird Strandings (IAAC)</p> <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
<p>8. Activities in Marine Refuges and Closure Areas (DFO, C-NLOPB & IAAC)</p> <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met

Commitment	Status
9. Consultation in Regulatory Development (IAAC) <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
10. Notification Requirements (IAAC) <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
11. Application of Exclusion (IAAC) <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met
12. Review of Ministerial Regulation (IAAC) <ul style="list-style-type: none"> The review process will occur within five years of the coming into force of the regulation – See 2021 MRPR 	Progress Ongoing
13. Adequate and Appropriate Modeling (IAAC) <ul style="list-style-type: none"> Schedule 2 of the Regulations establishes conditions related to adequate and appropriate drill cuttings. The C-NLOPB will verify compliance with these conditions. 	Completed – Ongoing Monitoring
14. Annual Follow-up Program Report (IAAC) <ul style="list-style-type: none"> The 2024-2025 RA Follow-up Program Report is anticipated to be published in Winter 2025 - 2026. 	Progress Ongoing
15. Long-term plan for the GIS Decision-support tool (IAAC, Government of Canada & Government of NL) <ul style="list-style-type: none"> Updated version of the GIS tool prepared and released in May 2021. Online hosting of the GIS tool was successfully transferred to the C-NLOPB and is accessible On-going identification of new and updated datasets for future GIS updates, with the advice of the RA Follow-up Advisory Committee. 	Completed – Ongoing Monitoring
16. Ministerial Response Progress Report (IAAC, Government of Canada & Government of NL) <ul style="list-style-type: none"> Commitment was fully met – See 2021 MRPR 	Completed – Fully Met

Commitment	Status
<p>17. Reviews and Reports (IAAC)</p> <ul style="list-style-type: none"> All of the commitments of parties, as outlined in the Ministerial Response, continue to be tracked and publicly reported in the annual RA Follow-up Program Report. 	<p>Completed – Ongoing Monitoring</p>
<p>18. Incorporating Diverse Perspectives (IAAC)</p> <ul style="list-style-type: none"> Members of the RA Follow-up Advisory Committee were appointed in July 2021. The Committee members represent a diversity of perspectives from Indigenous communities, the oil and gas industry, the fishing industry, environmental non-government organizations, academic interest groups, and the public. The RA Follow-up Program will continue to seek and incorporate diverse perspectives through engagement processes. Where appropriate, public comment periods will be held for reviewing and providing comments on key documents. 	<p>Completed – Ongoing Monitoring</p>
<p>19. Use of Studies and Scientific Reviews (DFO & ECCC)</p> <p>ECCC’s species-specific predictive modelling for seabirds</p> <ul style="list-style-type: none"> The comprehensive peer-review of tracking data and maps highlighting seasonal seabird use remains ongoing. A preliminary draft of seasonal predictive maps for common Atlantic species has been completed, though progress remains ongoing as additional data and new predictors are included. <p>DFO’s marine mammals species distribution modelling</p> <ul style="list-style-type: none"> Progress is ongoing and there continues to be good exchange of information between proponents, regulators, and DFO. Validation of sightings data in NL region has been completed, and this data has also been amalgamated into a single database for Atlantic Canada. The process of mapping additional acoustic whale detections for modelling purposes is ongoing and will augment the sightings data. Environmental data will be used in conjugation with the sightings information to create habitat models and these will be shared once validated. 	<p>Progress Ongoing</p>

Commitment	Status
<p>20. Scope of Factors for Assessment of Designated Projects (IAAC)</p> <ul style="list-style-type: none"> The scope of factors will continue to be monitored through the RA Follow-up Program – See 2021 MRPR. 	<p>Completed – Ongoing Monitoring</p>
<p>21. Atlantic Salmon (DFO)</p> <ul style="list-style-type: none"> Significant progress has been made towards the achievement of the Environmental Studies Research Fund (ESRF) project goal of determining the likelihood that Atlantic salmon from different rivers will enter areas of interest to oil and gas production/exploration. Field work and tagging has been completed for this project, data is now being compiled, and QA/QC procedures will be conducted with analysis ongoing. Preliminary data is being presented to collaborators, including a presentation to the Regional Assessment (RA) monitoring committee. This work represents a significant enhancement in operational capacity to detect salmon in offshore waters, and within the RA area. 	<p>Progress Ongoing</p>
<p>22. Leach’s Storm-petrels and other Relevant Species (ECCC)</p> <ul style="list-style-type: none"> The summary report, as part of a grants and contribution agreement, was received in Spring 2023. 	<p>Completed - Fully Met</p>
<p>23. Data Accessibility (DFO)</p> <ul style="list-style-type: none"> The Marine Spatial Planning (MSP) atlas of interactive maps was publicly launched on the MSP website on January 31, 2023, under the name of the Canada Marine Planning Atlas, and is accessible online. It was showcased at the pavilion of the Fifth International Marine Protected Areas (MPAs) Congress (IMPAC5), February 3 to 9, 2023 MarineCollab (formerly named the MSP Platform) is a SharePoint-based platform used to share information and collaborate with external partners (e.g. Federal/Provincial/Territorial governments, Indigenous governments and communities) involved in marine planning and conservation processes. Building on the success of the two regional pilot projects, the platform is now in use by every DFO MSP region. While not a data warehouse, the Platform provides MSP partners with access to knowledge and information products derived from the data, including but not exclusive to fisheries, with linkages to other tools such as the MSP Atlas and Open Data Portal. 	<p>Completed – Fully Met</p>

Commitment	Status
<p>24. Commercial Fisheries Data (DFO)</p> <ul style="list-style-type: none"> • DFO and C-NLOPB continue to hold regular meetings multiple times per year. Additionally, data experts in both organizations collaborated on adding petroleum data to the Canada Marine Planning Atlas. Using web mapping services published by the C-NLOPB, petroleum data is featured under the Add Data widget of the Canada Marine Planning Atlas. • The Eastern Canada Commercial Fishing was published to Open Data Canada on September 14, 2021. This dataset delineates catch per unit area by species and gear type for commercial fisheries from 2009 to 2018 for Eastern Canada DFO Regions. Catch per unit is generalized to 10 km² hexagons as total catch weight, in kg, per hexagon. DFO staff in NL Region are updating the commercial fisheries dataset to include information from 2012 to 2021. • Both this fisheries dataset and the Northwest Atlantic Fisheries Organization fishing zone boundaries are featured on the Canada Marine Planning Atlas published in January 2023. 	<p>Completed – Fully Met</p>
<p>25. Knowledge Sharing Protocol (DFO)</p> <ul style="list-style-type: none"> • The Office of the Chief Data Steward leads a national Data Sharing Agreement (DSA) Working Group as part of the national Data Governance Framework. • The group has worked with Subject Matter Experts (including Access To Information and Privacy, Legal) to develop a suite of data sharing agreement templates and a decision tree, assessment form and supporting guidance. • DSA templates cover one-time data sharing, data shared externally, data received from an external organization, and two-way data sharing with an external organization. Additional data sharing agreement guidance and processes, including those involving areas of Indigenous data sovereignty and traditional knowledge, aligned with DFO responsibilities under the United Nations Declaration of the Rights of Indigenous Peoples Act (UNDA), will be developed. • In addition to the DSA work, the Office of the Chief Data Steward is in the process of developing (or adopting/adapting as appropriate) guiding principles, requirements (roles and responsibilities), and assessment tools as part of the departmental data ethics and artificial intelligence policy suite which will guide DFO handling and use of data received. The Office is also pursuing opportunities to engage departmental working groups, other government departments, and Indigenous stakeholders to co-develop elements of the policy suite having potential implications for Indigenous communities. • DFO has funded (or in the process of finalizing funding for) eight workshops to be delivered in 2024-25 by Aboriginal Aquatic Oceans Resource Management (AAROM) departments. Workshops are 	<p>Progress Ongoing</p>

Commitment	Status
<p>focused on Indigenous Data Sovereignty and roles and responsibilities with respect to stewardship and use of Indigenous data and knowledge. Six workshops have been delivered by AAROM departments with DFO participation, with another scheduled for late March 2025, and another being finalized for Q4 in 2024-25.</p>	
<p>26. Information Gathering and Sharing Protocol (DFO)</p> <ul style="list-style-type: none"> The Marine Spatial Planning (MSP) atlas of interactive maps was publicly launched on the MSP website on January 31, 2023, under the name of the Canada Marine Planning Atlas and is accessible online. While, version 1 of the Atlas was developed after extensive user testing, DFO plans to provide 12 to 18 months for partners and stakeholders to familiarize themselves with the application before soliciting feedback on potential changes to develop a version 2 of the Atlas. 	<p>Completed – Fully Met</p>
<p>27. Accessibility of Marine Mammals and Sea Turtles Data (DFO)</p> <ul style="list-style-type: none"> Progress is ongoing and there continues to be good exchange of information between proponents, regulators and DFO (see also commitment 19 above). 	<p>Progress Ongoing</p>
<p>28. Standards for Marine Mammals Observers (DFO)</p> <ul style="list-style-type: none"> DFO is finalizing the process to establish standards of qualification for marine mammal observers. 	<p>Progress Ongoing</p>
<p>29. Surveys of Stranded Birds (ECCC)</p> <ul style="list-style-type: none"> ECCC continues to conduct quality control of stranded bird data collected by operators, enter new data in a timely manner upon receipt, and update the stranded bird database with historically collected data (primarily opportunistic searches). In 2024-2025, ECCC reviewed two seabird monitoring protocols to assist operators in delivering their monitoring programs. 	<p>Completed – Ongoing Monitoring</p>
<p>30. Information Availability and Data Gaps (C-NLOPB)</p> <ul style="list-style-type: none"> Assessment of the overall environmental risks, information availability and any data gaps for the specific area as part of the land tenure decision-making process will continue to be monitored through the RA Follow-up Program. 	<p>Completed – Ongoing Monitoring</p>

Commitment	Status
<p>31. Special Areas Initiatives (DFO & ECCC)</p> <p>ECCC (Progress ongoing)</p> <ul style="list-style-type: none"> • ECCC continues to engage with DFO and the Parks Canada Agency to ensure existing ECCC information available to inform decisions related to protected area establishment. • Foundational work to collect information continues to be underway and progress is being made towards the creation of a Marine National Wildlife Area in Newfoundland. ECCC has provided funding to support the Province of Newfoundland and Labrador and Miawpukek First Nation in increasing their capacity to engage in this initiative. <p>DFO (Completed – Ongoing monitoring)</p> <ul style="list-style-type: none"> • Best available information from a variety of sources, including science, Indigenous and community knowledge, continues to inform Government of Canada MPA and OECCM establishment and management processes. • DFO, in collaboration with the Canada-Newfoundland Labrador Offshore Petroleum Board (C-NLOPB), has developed operational guidance for minimizing impacts by offshore exploration drilling on cold water corals and sponges, including in OECCMs. • The details of the federal MPA Protection Standard were clarified in 2023 and published online. The Government of Canada’s 2022 Guidance for Recognizing Marine Other Effective Area-Based Conservation Measures (OECCMs) implements the federal marine OECCM Protection Standard. The guidance is available online. 	<p>Progress Ongoing</p>

Commitment	Status
<p>32. Availability of Spill Imagery (C-NLOPB)</p> <ul style="list-style-type: none"> In the event of an environmental emergency, ECCC’s National Environmental Emergency Centre (NEEC) can provide relevant experts in the field of environmental protection to support environmental emergency response. The Memorandum of Understanding (MOU) between ECCC and the C-NLOPB facilitates the sharing of information. ECCC and C-NLOPB engagement continues on the sharing of tools such as spill imagery that can be shared with Indigenous Groups and stakeholders. 	<p>Progress Ongoing</p>
<p>33. Guidance on Mitigating Effects to Corals and Sponges (DFO)</p> <ul style="list-style-type: none"> DFO, in collaboration with the Canada-Newfoundland Labrador Offshore Petroleum Board (C-NLOPB), has developed operational guidance for minimizing impacts by offshore exploration drilling on cold water corals and sponges, including in OECMs. This Guidance considers best available scientific information and advice, international best practices, regional industry practices, and feedback from interested parties. It takes a balanced approach to maintain high levels of environmental protection during exploratory drilling programs in Canada-Newfoundland and Labrador offshore area. 	<p>Completed – Fully Met</p>
<p>34. Updates to Seismic Sound Mitigation or Standards (DFO)</p> <ul style="list-style-type: none"> DFO is developing draft amendments to the Statement of Canadian Practice with respect to the Mitigation of Seismic Sound in the Marine Environment (the Statement) and will begin the process of consulting federal partners and stakeholder prior to the publication. The proposed amendments will incorporate new science and international best practices for seismic sound mitigation. 	<p>Progress Ongoing</p>
<p>35. Baseline Data on Contaminants Levels (DFO)</p> <ul style="list-style-type: none"> Review completed. 	<p>Completed – Fully Met</p>
<p>36. Land Tenure Decisions (C-NLOPB)</p> <ul style="list-style-type: none"> Inclusion of the information and analysis of the Regional Assessment and outcomes of the RA Follow-up Program in land tenure decisions is being monitoring regularly. 	<p>Completed – Ongoing Monitoring</p>

Commitment	Status
<p>37. Strategic Environmental Assessments (C-NLOPB)</p> <ul style="list-style-type: none"> There are currently no new SEAs or updates to existing SEAs in the RA Study Area. 	Progress Ongoing
<p>38. Exploratory Drilling Scenarios (Government of Canada, Government of NL & C-NLOPB)</p> <ul style="list-style-type: none"> The anticipated number of wells to be drilled on an annual basis, as well as the spatial distribution of those wells, do not exceed the RA Committee’s exploratory drilling scenarios. 	Progress Ongoing
<p>39. Cumulative Effects (Government of Canada, Government of NL & C-NLOPB)</p> <ul style="list-style-type: none"> With respect to Cumulative Effects, an MSP Governance and Engagement Structure was established to advance key elements of MSP. Most notably, two working groups (Data and Engagement) have been formed under the Canada-Newfoundland and Labrador Committee on Oceans Management to engage with key partners and stakeholders on information collection and sharing relevant to MSP. DFO’s Marine Spatial Planning program (2018-2024) identified cumulative impact mapping analysis as a national priority for development and advanced a process for cumulative impact mapping through the Canadian Science Advisory Secretariat (Murray et al. 2024). In this context, cumulative impacts refer to the effects of multiple pressures (created by human activities) acting together on valued components (e.g. habitats and/or species) in a given area. This work therefore involves combining spatial data layers of marine and coastal activities with ecological data as inputs in an analysis that models the interactions between stressors and habitats/species, resulting in a map of cumulative impacts. While this map can be used to support Marine Spatial Planning more generally, it can also help inform the existing knowledge on effects in Newfoundland and Labrador Region. DFO’s Newfoundland and Labrador (NL) Region had begun work on a cumulative impacts mapping exercise for marine activities using this existing knowledge base to guide the work. This regional exercise was placed on hold in fiscal year 2024-25 due to changes in funding. The C-NLOPB will provide information on recent, on-going, planned, and potential offshore oil and gas activities in the Study Area to the RA Follow-up Program. The C-NLOPB considers this information in its decisions regarding calls for bids, nominations, sector identification, and licensing decisions. 	Progress Ongoing
<p>40. Benefits Plans (C-NLOPB)</p>	Completed – Ongoing Monitoring

Commitment	Status
<ul style="list-style-type: none"> Benefits Plans for exploration drilling programs are a regulatory requirement and made publicly available on Operator’s websites. 	
<p>41. Diversity Plans (C-NLOPB)</p> <ul style="list-style-type: none"> Diversity initiatives must be included in Exploration Benefits Plans and are made publicly available on the Operator’s websites. 	Completed – Ongoing Monitoring
<p>42. Greenhouse Gas Emissions (ECCC & IAAC)</p> <ul style="list-style-type: none"> This commitment has been put on hold pending potential adjustments to the draft Sector GHG Analysis of Offshore NL Exploratory Drilling Report. 	On hold

6. Follow-up Program Effectiveness Evaluation

The purpose of the follow-up program effectiveness evaluation is to:

- Support accountability between the parties named in the terms of reference for the RA follow-up program;
- Identify gaps or improvements that may warrant an amendment to the terms of reference for the RA follow-up program; and
- Support ongoing learning for future post-RA activities.

To determine the effectiveness of the RA follow-up program, the program’s results are compared against targets that measure the achievement of the desired outcomes of the RA follow-up program. Annex I contains a logic model depicting how the RA follow-up program’s inputs and activities serve to achieve the desired program outcomes.

For the 2024-2025 reporting year, 8 targets were met, 3 targets were not applicable, and 0 target were not met (Table 4). The targets for ensuring new and emerging information are considered in decision-making and fulfilling the Ministerial Commitments were fully met. The targets for ensuring the highest standards of environmental protection continue to be maintained over time were partially not applicable for the reporting year as the single project operating under the Ministerial Regulation has not yet produced applicable information to support the review of the Ministerial Regulation. Based on the applicable targets for the 2024-2025 reporting year, the follow-

up program was effective in achieving the desired program outcomes.

TABLE 44: PERFORMANCE MEASUREMENT TABLE FOR THE 2024-2025 REPORTING YEAR FOR THE RA FOLLOW-UP PROGRAM.

Program Outcome	Indicators	Targets	Results and Comments
<p>New and emerging information is considered in decision-making (Logic Model Outcome 1B)</p>	<ul style="list-style-type: none"> • GIS Tool continues to be updated and is used to inform decision-making for exploratory drilling projects • Indigenous groups and stakeholders (including the RA follow-up program Advisory Committee) are engaged in reviewing and providing comments on key products of the RA FUP 	<ul style="list-style-type: none"> • RA FUP Advisory Committee reviews information and makes recommendations regarding the GIS Tool, where appropriate. • The RA FUP Advisory Committee makes recommendations to the Steering Committee, where appropriate. • The Steering Committee receives and considers advice, recommendations or comments on key documents of relevance to the RA. 	<ul style="list-style-type: none"> • Target met.
