DRAFT Cooperation Plan: Review Comments

Marten Falls All-Season Community Access Road

Date: January 28, 2020

Issue Number	Section Number	Section Title	Page	Request to IAAC for Revision or Clarification
1	1	Description of the Marten Falls Community Access Road Project	1	Marten Falls First Nation, as represented by Chief and Council (i.e. the proponent, and hereafter: 'MFFN') requests the deletion of ' <i>could enable future access road to potential mineral development activities in the Ring of Fire area</i> ' for the following reasons: 1) A mineral development supply road is not part of the Project; 2) because industry may choose to build a supply road in the absence of the Community Access Road. This comment applies to all DRAFT plans provided by the Impact Assessment Agency of Canada (IAAC).
2	3	Approach to Cooperation	1	Can IAAC clarify how coordination will occur with respect to the two jurisdiction timelines? MFFN requests for a graphic image for dissemination to all groups including Indigenous Communities for transparency.
3	4	Gathering and Review of Proponent Information	2	Request for an update to terminology of the commonalities for all discipline names to align with language used in the provincial Draft Terms of Reference and Detailed Project Description. It would also be helpful to identify where there are differences between the two jurisdictions for ease of understanding amongst readers.
4	6	Sharing of Information	2	Clarify intent and use of information sharing and how that will be disseminated to the Project Team, and expectations as to inclusion of the overall Project.
5	7	Public Participation	2	The Plan states that the expectation is to result in one body of documentation. Request that IAAC confirm that if MFFN wishes to submit two separate documents (i.e., provincial EA and federal IS), that this will be acceptable.
