Subject: Further to request for input on Coalspur expansion activities

Sensitivity: Normal

Hello federal colleagues,

Below, please find links to an application filed by Coalspur Mines (Operations) Ltd. to the Alberta Energy Regulator in early April, 2020. The application relates to the Vista Coal Mine and includes accelerated progression of a dump overburden disposal area; relocation of the explosive magazine, the ammonium nitrate prill and emulsion bin storage area; and associated soil and surface water management activities.

AER notice of application:

<https://www.aer.ca/regulating-development/project-application/notices/application-1928090.html>

The application and associated documents:

https://dds.aer.ca/iar_query/ApplicationAttachments.aspx?AppNumber=1928090

Please consider this application in your response to the Agency's letter of May 22, 2020 (Subject: Request for Federal Expert Advice - Designation Request for Proposed Expansion Activities of the Vista Coal Mine Project under the *Impact Assessment Act*).

Regards,

Shelly Boss
