## Proposed Deltaport Expansion Berth Four Project

## Early Engagement

- Early and ongoing engagement is a key focus for GCT in order to share Project-specific information and **work collaboratively to find solutions** that address issues and concerns.
- **Since 2016, 100+ meetings have occurred** – in person or virtual with municipalities, Regulatory Authorities, community and business associations, and NGOs to share Project information.
- GCT has also been engaging with 51 Indigenous nations represented by 33 Indigenous organizations; 17 of which have submitted notices to engage as Participating Indigenous Nations.
- Committed to keep the lines of **communication open**, to be **responsive** and to **build meaningful relationships**.

## Incorporating Feedback

---

Since the September 2020 submission of the Initial Project Description, GCT has continued to **advance the Project, including updates to Project activities, schedule, alternative means of carrying out the Project, and options to reduce the overall Project effects** based on feedback received through early engagement.

Recent updates include:

**Impact Assessment approach in consideration of the Nov 8th Draft Joint Guidelines, for example:**

- ✓ Cumulative Effects Assessment
- ✓ Indigenous Knowledge
- ✓ Local and Regional Assessment Areas

**Refinement of work-plans associated with Valued Components to describe existing conditions in advance of determining potential effects to:**

- ✓ Biophysical Environment
- ✓ Socioeconomic Conditions
- ✓ Human Health

## Our Commitment

---

- GCT will ensure that municipal, federal and provincial governments, Indigenous nations, the public and other interested parties are informed about the Project, **have access to information, and are encouraged to provide feedback** throughout the process – including this important comment period until January 7<sup>th</sup>.
- GCT is working to minimize the area of habitats impacted by the Project and is **planning further studies to understand the importance of habitats** to key receptors, such as salmon and SRKW.

## More Information

---

We look forward to ongoing engagement over the coming months to ensure we understand your views.
