Glossary

Term	Definition
Canadian Impact Assessment Registry (registry)	The Canadian Impact Assessment Registry is an internet site established and maintained by the Impact Assessment Agency of Canada and will be the official record of the integrated assessment process for the project.
Canadian Nuclear Safety Commission (CNSC)	As a lifecycle regulator, the CNSC regulates the use of nuclear energy and materials to protect health, safety, security and the environment in accordance with the <i>Nuclear Safety and Control Act</i> . The CNSC also implements Canada's international commitments on the peaceful use of nuclear energy, and disseminates objective scientific, technical and regulatory information to the public.
Hearing Procedures	Review panel document that provides an overview of how the public hearings will be conducted and explains how the public can participate in the hearings.
<i>Impact Assessment Act</i> (IAA)	The Impact Assessment Act and its regulations form the legal framework for federal impact assessments.
Impact Assessment Agency of Canada (IAAC)	IAAC is a federal body accountable to the Minister of Environment, Climate Change and Nature . IAAC provides high-quality impact assessments that contribute to informed decision-making, in support of sustainable development. IAAC is the responsible authority for all federal impact assessments.
Impact Statement	Detailed technical document prepared by the proponent as per the requirements set out in the Integrated Tailored Impact Statement Guidelines which would include CNSC's requirements for the initial licence.
Integrated Impact Assessment (integrated assessment)	Review of the proposed project, led by a review panel that will meet the federal requirements for an integrated assessment under the <i>Impact Assessment Act</i> and the <i>Nuclear Safety and Control Act</i> .
Integrated Review Panel (review panel)	An Integrated Review Panel is a group of independent experts appointed by the president of IAAC to conduct an integrated assessment. At least one review panel member is appointed from the CNSC's roster. The members are selected based on their knowledge or experience relative to the potential effects of the project or knowledge of Indigenous issues and must be free from bias or conflict of interest relative to the project.

Term	Definition
Integrated Tailored Impact Statement Guidelines (Integrated Guidelines)	Document that provides direction for the proponent in preparing an Impact Statement.
Local municipalities	Consists of Northumberland County, Regional Municipality of Durham, City of Kawartha Lakes and Peterborough County / City of Peterborough, the Municipality of Port Hope, Town of Cobourg, Hamilton Township and the Municipality of Clarington.
Memorandum of Understanding on Integrated Impact Assessments Under the <i>Impact Assessment Act</i> Between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission (MOU)	The Memorandum of Understanding on Integrated Impact Assessments Under the <i>Impact Assessment Act</i> Between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission creates an administrative framework within which IAAC and the CNSC can cooperatively allow for the exercise of the powers and duties established by the <i>Impact Assessment Act</i> and the <i>Nuclear Safety and Control Act</i> , as necessary, and as reflected in those Acts. The Memorandum of Understanding confirms the commitment of IAAC and the CNSC to work collaboratively to ensure that integrated assessments are conducted in an efficient manner.
<i>Nuclear Safety and Control Act</i> (NSCA)	The Nuclear Safety and Control Act establishes the CNSC and sets out its mandate, responsibilities and powers.
Participant	Broadly defined to mean anyone appearing at or participating in an integrated assessment process, including public hearings, consistent with the CNSC's Rules of Procedures .
Public	In the context of this integrated assessment, public typically refers to the general population, or residents, without reference to geographical limits of any city, town, region or province.
Review Panel Secretariat	Staff members from IAAC and the CNSC who support the review panel in fulfilling its work and responsibilities and who operate within its deliberative privilege. In the case of a joint review panel, the secretariat may also include staff from another jurisdiction (for example, a province).

1. Introduction

This Public Participation Plan describes how the Impact Assessment Agency of Canada (IAAC), the Canadian Nuclear Safety Commission (CNSC) and, where applicable, the review panel will support public participation during the integrated assessment of the New Nuclear at Wesleyville Project (the project). It is not intended to direct or govern the activities of Ontario Power Generation (the proponent).

On April 2, 2026, IAAC determined that an impact assessment is required for the project, pursuant to section 16 of the *Impact Assessment Act* (IAA). On the same day, IAAC, on behalf of the Minister of Environment, Climate Change and Nature (Minister) referred the impact assessment to a review panel. The project includes physical activities regulated under the IAA and the *Nuclear Safety and Control Act* (NSCA). Pursuant to section 43 of the IAA, the Minister must refer to a review panel designated projects that include physical activities regulated under the NSCA. The review panel will conduct an integrated impact assessment (integrated assessment) that includes regulatory requirements from IAAC and the CNSC and follows the framework outlined in the [Memorandum of Understanding on Integrated Impact Assessments Under the *Impact Assessment Act* between the Impact Assessment Agency of Canada and the Canadian Nuclear Safety Commission](#) (MOU).

IAAC and the CNSC will cooperate with the common objective that both legislative requirements are achieved in a single integrated assessment, with an assessment outcome including both a decision under the IAA and an initial licensing decision under the NSCA.

The Government of Canada is committed to providing the public, and local municipalities, with the opportunity and information needed to participate in an informed and meaningful way throughout the integrated assessment process.

The Public Participation Plan for the assessment of the project is developed by IAAC and the CNSC to set out opportunities for participation during the integrated assessment process. The Public Participation Plan is intended to be flexible and does not preclude IAAC, the CNSC or the review panel from making changes to the approaches described in this plan to adjust and develop engagement activities that are inclusive and responsive to the public and local municipalities' needs, and to encourage meaningful public participation during the integrated assessment process.

For more information on public participation under the IAA, please see the [Framework: Public Participation Under the *Impact Assessment Act*](#) and [Guidance: Public Participation Under the *Impact Assessment Act*](#).

This plan is intended to be inclusive of all people, including Indigenous peoples, where appropriate. A distinct and separate [Indigenous Engagement and Partnership Plan](#) for the assessment of the proposed project is also available, outlining opportunities and methods for meaningful consultation and engagement with First Nations and other Indigenous communities whose Indigenous rights may be adversely impacted by the project.

2. Description of the proposed project

The proponent is proposing the construction of a new nuclear power plant in the Municipality of Port Hope, Ontario. As proposed, the project would provide up to 10,000 megawatts of new nuclear generating capacity and operate for 78 years. Several nuclear reactor technologies will be considered for the project. The project assessment and initial licence application review are being conducted in collaboration with the CNSC.

As part of the integrated assessment process, the proponent will be submitting the balance of the required information to complete the application for a licence to prepare site. The proponent may pursue subsequent licences to construct, operate, and decommission at later stages, should the project be approved.

For more information on the project, please review the proponent's [Initial Project Description](#). For more information on the integrated assessment of the project or to view the information and comments received, visit the [New Nuclear at Wesleyville Project page](#) on the Canadian Impact Assessment Registry (the registry) at: <https://iaac-aeic.gc.ca/050/evaluations/proj/89802>

3. Objectives of public participation

The Public Participation Plan outlines the various ways participants may provide input and engage in the integrated assessment process. The following are IAAC's and CNSC's objectives for public participation:

- Public participation is meaningful. This means that the public and local municipalities are provided with:
 - Inclusive, accessible and predictable opportunities to take part in the integrated assessment;
 - the information they need to participate, in a timely manner, and in a format that is accessible; and
 - the capacity and resources to participate in an informed manner.
- The public and local municipalities are engaged early and often, especially in each key phase of the integrated assessment process.
 - The public and local municipalities bring forward key issues and information early in the process to inform the proponent's Impact Statement.
 - The proponent is continually informed about the concerns raised and information shared by participants.
 - The public and local municipalities are involved in the development and/or revision of key documents, including this plan, the [Integrated Tailored Impact Statement Guidelines](#) (Integrated Guidelines), the draft review panel's Terms of Reference, the proponent's Impact Statement, and the draft potential conditions.
 - In this case, with the assessment conducted by a review panel, a key opportunity for public and local municipalities participation includes participation in the public hearings.

- The selection of participation opportunities and mechanisms at each key phase in the process is based on the needs, interests, and values of the public. Opportunities include, but are not limited to, comment periods, public hearings, presentations to local municipal councils, and in-person or virtual information or consultation events.
- Public and local municipalities' views are heard throughout the process are tracked, meaningfully considered and inform decision-making.
- The objectives, tools and activities of this plan inform the review panel's Terms of Reference.

4. Identification of participants

IAAC and the CNSC invite all individuals, local municipalities, groups and organizations with an interest in the assessment of the project to participate in the process and related engagement activities.

Distribution list

During the integrated assessment process, IAAC and the review panel, once established, will maintain a distribution list for the integrated assessment of the project. Participants on the distribution list will receive updates and notices about the integrated assessment for the project as the process progresses.

If individuals or organizations would like to be on the distribution list, they can send an e-mail to wesleyville@iaac-aeic.gc.ca with their full name and e-mail address or write a letter to IAAC at the address listed in [section 9](#) with their name and mailing address. Individuals' names will not be published.

If you already indicated that you would like to be added to the distribution list, please do not sign up again. In the event that your contact details change, please reach out to us to update this information.

Please refer to the [Indigenous Engagement and Partnership Plan](#) for the list of First Nations and other Indigenous communities that are identified for engagement and partnership as part of the integrated assessment of the project. This list may be updated throughout the consultation and engagement process as IAAC and the CNSC receive and gather more information on the potential adverse impacts of the project and Indigenous and treaty rights that may be affected.

5. Public participation tools

IAAC and the CNSC plan to use the following communication and engagement tools to ensure meaningful participation throughout the integrated assessment process. The methods listed include feedback received from the public during engagement events conducted by IAAC and the CNSC in January, April and May 2026.

Increase awareness

To share information and updates on the process, announce public participation opportunities, objectives of comment periods, and funding opportunities:

- Public notice(s) and key documents in plain language published on the registry, in public viewing centres (see Appendix), newspapers, news websites, television and radio broadcasts, and mailouts;
- E-mail updates to the distribution list;
- In-person and virtual interactive community and information sessions;
- In-person pop-up information booths; and
- Social media updates.

Build understanding

- Training opportunities about the [integrated assessment process](#) (as requested);
- Information sessions and open houses to learn more about the project, the integrated assessment process and how to submit comments (held virtually and in-person);
- Where appropriate, meetings, focus groups, presentations, and workshops; and
- Sharing plain language summaries of key documents, fact sheets, infographics, and presentation materials in an accessible format.

Participate and review

- Public comment periods at key stages of the process;
- Posting of written comments and all other materials relevant to the assessment on the registry during public comment periods and throughout the process;
- Sharing summaries of what we heard following public comment periods; and
- Public hearings held by the review panel. This can include submitting written comments or coming in person to hearings to share information that could help with the assessment.

Note that this list is not exhaustive and may be adjusted during the course of the integrated assessment to facilitate public participation and to ensure efficient execution of the integrated assessment.

6. Activities and public participation approach

The following table provides a description of the main phases of the integrated assessment process, and an outline of engagement opportunities in each phase, including events led by IAAC, the CNSC, and the review panel. The table describes the objectives of each phase, the anticipated engagement activities that will be used, and the engagement methods that will support the activities.

To support the accessibility of engagement activities and methods, IAAC and CNSC will ensure that materials are distributed in accessible formats, meet [plain language standards](#), and are available in alternative formats, where requested. Information sessions may be held separately in both official languages. Public hearings will include interpretation in both official languages. Interpretation in ASL and LSQ can be made available upon request with sufficient notice, at information sessions and public

hearings. The objectives of the [Public Participation Plan](#) will be considered for incorporation into the review panel's Terms of Reference. The review panel will select engagement activities that align with any rules or procedures it develops or adopts.

**Table 1: Table of public participation approaches and activities****Phase 1: Planning**

This Phase commenced on January 12, 2025, with the acceptance of the [Initial Project Description](#) (IPD).

Objectives of the Phase	Expected Activities	Public Participation Tools
• Raise public awareness of the integrated assessment process, including opportunities for meaningful participation. • Support understanding of the project and its potential impacts. The integrated assessment process allows for early identification of issues and concerns. • Provide an opportunity for participants to apply for funding to support their participation in the Planning phase of the integrated assessment. • Gather public and local municipalities' input and views on the draft Integrated Guidelines and the draft Public Participation Plan, prior to finalizing these documents.	Completed activities: • From January 12 to February 11, 2026, IAAC and the CNSC invited comments on the summary of the Initial Project Description. • IAAC and the CNSC presented virtually to Port Hope Council on January 20, 2026. • From January 21 to 24, 2026, IAAC and the CNSC held in-person pop-up booths in Alnwick/Haldimand, Clarington and Cobourg and an open house in Port Hope. • IAAC and the CNSC held virtual information sessions on January 27 and 29, 2026. • IAAC and the CNSC used the comments received on the summary of the IPD to prepare the Summary of Issues and provided it to the proponent on February 20, 2026. • The proponent responded to the Summary of Issues on March 19, 2026. • IAAC referred the project to a review panel on April 2, 2026. • From April 7 to May 7, 2026, IAAC and the CNSC invited comments on the draft	• Notices on the registry, newspaper and radio, and social media updates. • Online comment period(s) (via the registry). • Meetings, information sessions, open houses, pop-up information booths, and/or workshops (virtual or in-person). • Meetings with municipal staff, Council members, and public organizations. • Community sessions, virtual or in-person, held in the communities most likely to be affected by the project. • Copies of key documents made available in the viewing centres indicated in Appendix 1. • Responding to inquiries on the registry, by e-mail, by mail, or by phone.

	Integrated Guidelines and the draft Public Participation Plan. • IAAC and the CNSC used the comments received on the draft Integrated Guidelines and draft Public Participation Plan to finalize those documents. • IAAC administered participant funding to support participation in the integrated assessment process. • IAAC posted the Notice of Commencement of the Impact Assessment and related documents on July 10, 2026, ending the planning phase. Ongoing and expected activities: • IAAC and the CNSC will publish a What We Heard report and Planning Phase Questions and Answers document, no later than six months after the close of the Planning Phase, to reflect how public and local municipalities' views were heard and incorporated into final documents.	
--	---	--

Phase 2: Impact Statement

This phase commences upon posting the Notice of Commencement of the Integrated Assessment and related documents.

Objectives of the Phase	Expected Activities	Public Participation Tools
• Increase public awareness and understanding of the integrated assessment process and how to meaningfully participate. • Encourage the public and local municipalities to provide information to the proponent to inform the development of the Impact Statement. • Notify participants of key steps in the process such as the receipt of the Impact Statement, the appointment of the review panel, and the comment period on the Summary of the Impact Statement. • Seek public and community knowledge related to environmental, social, health and economic impacts of the project. • Obtain feedback on the potential effects of the project and proposed mitigation measures to help the review panel understand views about the project and inform its assessment of potential effects (during the Impact Assessment Phase). • Review the proponent's Summary of the Impact Statement information and address any outstanding issues or deficiencies	• IAAC and the CNSC will invite comments on the draft Terms of Reference for the review panel. • IAAC and the CNSC will review the Impact Statement to determine whether all information and studies requested in the Integrated Guidelines have been provided. IAAC and the CNSC may request additional information from the proponent if the Impact Statement does not conform to the Integrated Guidelines. • IAAC and the CNSC will invite comments on Summary of the Impact Statement. The Impact Statement and the Summary of the Impact Statement will be posted to the registry, and a notification e-mail will be sent to the distribution list. • IAAC and the CNSC will engage with the public and local municipalities to prepare for the Impact Assessment phase. • If applicable, IAAC and the CNSC will invite comments on any agreement with other jurisdictions pertaining to the establishment of a review panel or the coordination of assessment procedures.	• Public notices announcing participation opportunities on the Registry, e-mails to the distribution list and updates on social media. • E-mails to the distribution list informing participants of key steps in the process. • Posting of documents relevant to the integrated assessment and comments received on the registry. • Comment periods (via the registry) on the proponent's Impact Statement Summary and the draft review panel's Terms of Reference. • Copies of key documents will be placed in the viewing centres in Appendix 1. • Information sessions (virtual or in-person) or open houses in the communities of those most likely to be affected by the project. IAAC and the CNSC will also attend existing community events, where feasible. • As requested, IAAC and CNSC staff will provide updates/presentations to local municipal councils, stakeholders and/or community organizations. • As requested, establish a technical working group between IAAC, CNSC and local municipalities to discuss project-specific issues

raised by the public and local municipalities. • Seek public and community input on the draft Terms of Reference for the review panel	• IAAC and the CNSC will hold information sessions to explain the process and to provide an opportunity to comment on the Summary of the Impact Statement. • Should local municipalities hold their own public engagement activities, IAAC and CNSC staff may attend, if requested. • The review panel members may be appointed and may attend cultural training with First Nations and other Indigenous communities and orientation activities. • This phase is complete when IAAC and the CNSC are satisfied that the proponent submitted all the information and studies required in the Integrated Guidelines. • IAAC and CNSC may publish additional follow-up materials to reflect how the public and local municipalities' inputs were heard and used.	of municipal interest, including land use planning, infrastructure, emergency management, socio-economic effects, and cumulative effects.
--	---	--

Phase 3: Impact Assessment

The Impact Assessment phase is led by the review panel and occurs immediately after IAAC issues the notice under s.19(4) of the IAA indicating that it is satisfied that the proponent has submitted all necessary information and studies.

IAAC will establish the time limits for this phase including the time limit for the submission of the review panel report and for the posting of IAAC's recommendations on potential conditions on the registry. Once appointed, the review panel will carry out its mandate independently and in accordance with its Terms of Reference. The review panel will determine the appropriate approach to public engagement during the review panel process, including the timing, format and location of participation opportunities and public hearing sessions. The activities described below are intended to provide an overview of anticipated opportunities for public participation; however, the review panel may adapt its approach to support meaningful and accessible participation and to meet the requirements of its Terms of Reference.

Objectives of the Phase	Expected Activities	Public Participation Tools
• Increase public awareness and understanding of the integrated assessment process, including opportunities for meaningful public participation, and encourage participants to participate in the public hearings. • Obtain the views of participants on the information contained in the Impact Statement to ensure the review panel sets up meaningful and accessible public hearings for all participants. • In advance of the hearings, seek the following to inform the review panel's rationale, conclusion and recommendations. ○ Views or information on any topic that has been covered in the Impact Statement or is part of the	• Establishment of the review panel and its mandate in the Terms of Reference. • The review panel may organize information sessions to explain activities and timelines related to the review panel process. • Public comment period(s), information sessions and opportunities to submit written hearing submissions are held by the review panel, in accordance with its Terms of Reference. • The review panel may ask for additional information of the proponent or participants before it determines that the information on the record is sufficient to proceed to a public hearing. • The review panel may hold a comment period on the draft public hearing procedures.	• Potential public comment period(s), and information sessions held and determined by the review panel • Public hearing sessions to discuss the project's potential effects, mitigation measures and follow-up program. • Written or oral submissions by participants during the public hearings. • Public notices announcing the participation opportunities, e-mails to the distribution list and updates on social media. • Once the review panel record is closed, IAAC and the CNSC will continue to receive and post comments on the registry, but these will not be considered by the review panel and will not be part of the record.

scope of the assessment, as set out in the Integrated Guidelines. • Obtain information via the hearings.	• The review panel will be mandated to hold meaningful and accessible public hearing sessions in the communities most likely to be affected by the project. Participation timelines, dates, locations and duration for the public hearings will be determined by the review panel and will be announced in a Notice of Public Hearing. • Following the close of the review panel record, the review panel will prepare its report. The report will contain the review panel's rationale, conclusion and recommendations. • IAAC will post a notice and e-mail the distribution list to notify participants when the review panel's report has been submitted to the Minister and is posted on the Registry. • IAAC will continue to administer funding to support participation in the integrated assessment process.	
---	---	--

Phase 4: Decision Making

The Decision-Making phase starts following the posting of IAAC's recommendations on potential additional conditions and ends with Governor in Council's decision.

Objectives of the Phase	Expected Activities	Public Participation Tools
• Inform the proponent, the public and local municipalities about the decision of Governor-in-Council. • Inform the public and local municipalities on the project conditions under the IAA as described in the Minister's decision statement.	• No engagement activities during this phase • IAAC will post the Decision Statement on the registry, including the reasons for the public interest determination and, if the project is allowed to proceed, the conditions with which the proponent must comply. • Where applicable, the Government of Canada issues a response to the review panel's recommendations that relate to federal mandates and interest.	• Decision Statement will be posted on the registry. • Public notices, e-mail sent to the distribution list and updates on social media.

Phase 5: Post Decision

The Decision Statement will expire if the proponent does not substantially begin to carry out the project within a certain period. This period is established by the Minister in Phase 4, considering views provided by the proponent.

If project receives a positive IA decision

Objectives of the Phase	Expected Activities	Public Participation Tools
• Inform the public and local municipalities on the review panel's licensing decision, including the project's conditions under the NSCA. • The public and local municipalities can comment at any time if they have concerns about a proponent not complying with the	• The review panel makes the licensing decision, and if a licence is granted, issues the licence to prepare site. • IAAC and/or the CNSC post required follow-up and monitoring documents on the registry and/or the CNSC's website, according to the schedule identified in the Decision Statement.	• Public notices, website postings, and e-mails sent to the distribution list and updates on social media. • Comment period (via the registry) on potential amendments to the Decision Statement. • The public and local municipalities can comment at any time if they have concerns about a proponent not complying with the

conditions of the project as set out by IAAC or the CNSC. • Inform the public and local municipalities of follow-up and monitoring activities and results from follow-up program. • Inform participants of potential amendments to the Decision Statement. • Inform participants on potential licensing amendments • Participants may take part in follow-up and monitoring activities and inform IAAC of potential non-compliance. • Transfer the lead role for public engagement throughout the lifecycle of the project from IAAC to the CNSC.	• The duration of a potential public comment period on potential amendments to the Decision Statement will be determined by IAAC and will be announced during the post-decision phase, on an as-needed basis. • IAAC transfers the lead role for public engagement in the regulatory oversight of the project to the CNSC. • Post-decision communications activities related to nuclear licensing and regulatory oversight will be led by the CNSC. These include communications on participant funding, Commission proceedings and decisions, and compliance. • The CNSC administers participant funding to support public participation in future licensing processes throughout the lifecycle of the project. • The CNSC is responsible for conducting compliance verification activities to confirm the licensee is meeting the conditions set out in their licence.	conditions of the project as set out by IAAC or the CNSC.
--	--	--

7. Participant funding

Funding to support public participation is available. For information about who is eligible for funding or to apply for funding, visit [IAAC's Participant Funding Program](#).

For more information, contact IAAC's Funding Program by telephone at 1-866-582-1884 or by e-mail at fp-paf@iaac-aeic.gc.ca.

Should the project be allowed to proceed after the integrated assessment process is complete, funding will be available in the post-decision phase through [CNSC's Participant Funding Program](#) to support public participation in future licensing processes throughout the lifecycle of the project.

8. Submitting comments

For the review panel to consider comments, they must be part of the project record and posted to IAAC's registry. Therefore, during the assessment, IAAC and the CNSC will rely on the registry as the public record for comments. IAAC and the CNSC will work to streamline the collection and public dissemination of information while ensuring their respective legislative requirements are satisfied.

Comments may be submitted at any time during the integrated assessment by using the "Submit a comment" feature on the proposed project's page on the registry (reference number 89802, [New Nuclear at Wesleyville Project](#)). Attachments can be uploaded using this feature. Comments may also be submitted by e-mail or by regular mail to the address listed in section 9.

If you have any difficulties with the submission process, please contact IAAC and, when the review panel is appointed, the review panel's secretariat, using the contact information below. e-mail Note that the "Submit a comment" feature may be disabled from the time the review panel closes the record and prepares its report until the submission of the report to the Minister. Should IAAC conduct a comment period after the release of the report, the function would be reactivated, and a notice would be sent out to the distribution list.

Comments and other documents received by IAAC or the review panel will be part of the public project file and will be posted on the registry website. IAAC's [Submission Policy](#) determines what information can be shared publicly and what information should remain private. For more information on how we protect your privacy, please refer to IAAC's [Privacy Notice](#). If you do not want your comment to be posted on the registry, please contact IAAC before submitting your comment.

9. Contact information

The IAAC office designated for administering the integrated assessment of the project in collaboration with the CNSC is:

Integrated Assessment for the New Nuclear at Wesleyville Project
Impact Assessment Agency of Canada
Review Panel Division
160 Elgin Street, 22nd Floor
Ottawa, Ontario K1A 0H3
Phone: 343-596-8128
