

VOLUME 2: TABLE OF CONTENTS

AUTHORSHIP

ABBREVIATIONS AND ACRONYMS

DEFINITIONS

10	Effects Assessment Methodology	10-1
10.1	Technical Studies and Planning	10-1
10.2	Selection of Valued Components	10-1
10.2.1	Identification of Candidate Valued Components – Step 1	10-2
10.2.2	Project Interaction Identification – Step 2	10-3
10.2.3	Selection of Valued Components – Step 3	10-3
10.3	Assessment Boundaries	10-4
10.3.1	Spatial Boundaries	10-4
10.3.1.1	Local Assessment Areas	10-4
10.3.2	Temporal Boundaries	10-6
10.4	Effects Assessment Methods	10-7
10.4.1	Baseline Conditions	10-7
10.4.2	Description of Potential Adverse Effects on Valued Components	10-7
10.4.2.1	Identification of Mitigation Measures	10-8
10.4.2.2	Characterizing Residual Effects	10-9
10.4.2.3	Significance of Residual Effects	10-10
10.4.2.4	Follow-up Programs	10-10
10.5	Cumulative Effects Assessment	10-11
10.5.1	Spatial and Temporal Boundaries	10-11
10.5.1.1	Spatial Boundaries: Regional Assessment Areas	10-11
10.5.1.2	Temporal Boundaries: The Cases	10-12
10.5.2	Projects and activities included in the cumulative effects assessment	10-13
10.5.2.1	Sources of Information about Potential Projects and Activities	10-13
10.5.2.2	Criteria for Identification of Specific Projects for Consideration in the Cumulative Effects Assessment	10-14
10.5.2.3	Active Projects on Registry Websites	10-15
10.5.2.4	Registered Oil and Gas Project and Applications	10-15
10.5.2.5	Registered British Columbia Water Licences and Applications	10-16
10.5.2.6	British Columbia Land Tenure Applications	10-16
10.5.2.7	Current Harvest Plans Associated With British Columbia Tenured Forest Operations And Timber Sales	10-18
10.5.2.8	British Columbia Official Community Plans, and Parks and Recreation Plans	10-18
10.5.2.9	Large Waste Discharges into Peace River Watershed	10-19
10.5.2.10	Alberta Projects and Activities	10-19
10.5.3	Projects and Activities for Consideration in the Cumulative Effects Assessment	10-20
10.5.4	Identification and Description of Cumulative Effects	10-21
10.5.5	Identification of Cumulative Effects Mitigation Measures	10-22
10.5.6	Characterizing Residual Cumulative Effects	10-22
10.5.7	Significance of Residual Cumulative Effects	10-22
	References	10-23
	Literature Cited	10-23

Internet References	10-23
11 Environmental Background	11-1
11.1 Previous Developments	11-2
11.1.1 Existing Hydroelectric Generation Projects on the Peace River	11-2
11.1.2 Environmental Changes Resulting From Previous Developments	11-3
11.1.2.1 Physical Conditions.....	11-3
11.1.2.2 Biological Conditions	11-6
11.1.3 Follow-Up Programs.....	11-10
11.1.4 Historic Grievances regarding Existing Facilities	11-12
11.2 Geology, Terrain, and Soils	11-14
11.2.1 Physiography and Topography	11-14
11.2.2 Geology	11-15
11.2.2.1 Regional Bedrock Geology	11-15
11.2.2.2 Regional Glacial History	11-15
11.2.2.3 Regional Surficial Geology and Terrain Stability	11-16
11.2.2.4 Dam Site Geology.....	11-17
11.2.3 Reservoir Impact Lines.....	11-20
11.2.3.1 Background.....	11-20
11.2.3.2 Simplified Geological Mapping Units	11-20
11.2.3.3 Landslide Inventory.....	11-22
11.2.3.4 Slope Angle Inventory.....	11-24
11.2.3.5 Groundwater Flow.....	11-25
11.2.3.6 Floods and Wind-Generated Waves.....	11-26
11.2.3.7 Reservoir Shoreline Erosion	11-27
11.2.3.8 Slope Stability	11-28
11.2.3.9 Landslide-Generated Waves	11-29
11.2.3.10 Reservoir Impact Lines	11-30
11.2.3.10.1 Flood Impact Line.....	11-31
11.2.3.10.2 Erosion Impact Line	11-31
11.2.3.10.3 Stability Impact Line	11-31
11.2.3.10.4 Landslide-Generated Wave Impact Line	11-31
11.2.3.11 Shoreline Classification	11-31
11.2.3.12 Consideration for Land Use and Public Safety within the Impact Lines	11-33
11.2.3.12.1 Land Use.....	11-33
11.2.3.13 Hudson’s Hope Shoreline Protection.....	11-34
11.2.3.13.1 Highway 29	11-34
11.2.3.14 Shoreline Monitoring and Impact Line Updates.....	11-34
11.2.4 Geochemistry	11-35
11.2.4.1 Geochemical Characterization Program.....	11-35
11.2.4.1.1 Overview	11-35
11.2.4.1.2 Tests for Determining Acid Rock Drainage and Metal Leaching Potential	11-36
11.2.4.1.3 Phases 1 through 4	11-37
11.2.4.1.4 Phases 5 and 6	11-38
11.2.4.2 Dam Site	11-39
11.2.4.2.1 Bedrock	11-39
11.2.4.2.2 Overburden	11-40
11.2.4.2.3 Material Management	11-40
11.2.4.3 Off-Site Construction Materials.....	11-40
11.2.4.4 Highway 29 Materials	11-41
11.2.4.5 Monitoring	11-41

11.2.5	Regional Seismicity and Seismic Hazard.....	11-42
11.2.5.1	Regional Seismicity.....	11-42
11.2.5.2	Site-Specific Seismic Hazard Assessments	11-44
11.2.5.2.1	2009 Seismic Hazard Analysis	11-45
11.2.5.2.2	2012 Seismic Hazard Assessment	11-46
11.2.5.3	Potential for Seismicity Induced by Reservoir Filling.....	11-48
11.2.5.4	Potential for Seismic Seiches and Tsunamis	11-49
11.2.5.4.1	Seismic Seiches.....	11-49
11.2.5.4.2	Tsunamis.....	11-51
11.2.5.5	Current Understanding of How Petroleum Industry-Related Activities May Affect Seismicity.....	11-51
11.2.5.6	Ongoing Seismic Monitoring During Operation	11-52
11.3	Land Status, Tenure, and Project Requirements	11-53
11.3.1	Overview.....	11-53
11.3.1.1	Fee Simple Tenure	11-54
11.3.1.2	Dam Site Area – Permanent Structures	11-54
11.3.1.3	Reservoir – Inundation.....	11-55
11.3.1.4	Highway 29 Realignments	11-55
11.3.1.5	Old Fort Road Realignment.....	11-55
11.3.2	Permanent Statutory Rights-of-Way Required.....	11-55
11.3.2.1	Reservoir Impact Lines	11-56
11.3.2.2	Transmission Line.....	11-57
11.3.2.3	Project Access Road	11-57
11.3.3	Temporary Tenure Required.....	11-58
11.3.3.1	Proposed Conveyor Route (85th Avenue Industrial Lands) to Dam Site Area	11-59
11.3.3.2	Construction Access and Clearing Roads	11-59
11.3.3.3	Dam Site Area.....	11-59
11.3.3.4	One-Time Clearing Zone	11-59
11.3.3.5	Quarried and Excavated Construction Materials	11-60
11.3.4	Third-Party Crown Land Tenures.....	11-60
11.4	Surface Water Regime	11-62
11.4.1	Regulatory and Policy Setting.....	11-62
11.4.2	Baseline Conditions.....	11-62
11.4.2.1	Overview of Peace River Hydrology and Physiography	11-62
11.4.2.2	Water Survey of Canada Flow Measurements.....	11-63
11.4.2.3	Changes to Surface Water Regime due to Regulation.....	11-65
11.4.2.4	Baseline Flows and Water Levels.....	11-66
11.4.2.4.1	Seasonal Flows.....	11-67
11.4.2.4.2	Daily Average Flows and Water Levels	11-67
11.4.2.4.3	Within-Day Flow and Water Level Variations	11-68
11.4.3	Surface Water Conditions During Construction	11-68
11.4.3.1	Approach and Methods.....	11-69
11.4.3.2	Expected Changes.....	11-69
11.4.3.2.1	Channelization	11-70
11.4.3.2.2	River Closure	11-71
11.4.3.2.3	Diversion	11-71
11.4.3.2.4	Reservoir Filling	11-72
11.4.3.3	Uncertainties	11-72
11.4.4	Surface Water Conditions During Operation (Reservoir).....	11-72
11.4.4.1	Approach and Methods.....	11-73
11.4.4.2	Expected Changes.....	11-74
11.4.4.2.1	Site C Reservoir Water Levels.....	11-74

11.4.4.2.2	Operational Flow Releases	11-74
11.4.4.2.3	Spill Frequency, Magnitude, Duration and Seasonality	11-75
11.4.4.3	Uncertainties	11-76
11.4.5	Surface Water Conditions During Operation (Downstream)	11-77
11.4.5.1	Approach and Methods	11-77
11.4.5.2	Expected Changes	11-77
11.4.5.2.1	Reasons to Expect Change	11-77
11.4.5.2.2	Timing of Release	11-79
11.4.5.2.3	Magnitude of High and Low Flows	11-79
11.4.5.2.4	Frequency of High and Low Flows	11-80
11.4.5.2.5	Daily Water Level Range	11-81
11.4.5.2.6	Wetted Width and Average Cross-Sectional Velocity	11-81
11.4.5.2.7	Summary of Expected Changes	11-82
11.4.5.3	Uncertainties	11-82
11.4.5.4	Influence on Existing Hydrometric Stations	11-82
11.4.6	Climate Change	11-83
11.5	Water Quality	11-84
11.5.1	Regulatory and Policy Setting	11-84
11.5.2	Baseline Conditions Water Quality	11-84
11.5.2.1	Total Dissolved Gas Pressure	11-86
11.5.2.2	Temperature	11-86
11.5.2.3	Dissolved Oxygen	11-87
11.5.2.4	Total Suspended Solids	11-87
11.5.2.5	Alkalinity and pH	11-87
11.5.2.6	Nutrients	11-88
11.5.2.7	Metals	11-89
11.5.2.8	Drinking Water Sources	11-91
11.5.3	Baseline Conditions Sediment Quality	11-91
11.6	Groundwater Regime	11-92
11.6.1	Introduction	11-92
11.6.2	Technical Study Area	11-92
11.6.3	Regulatory and Policy Setting	11-92
11.6.4	Approach and Methods	11-93
11.6.4.1	Review of data sources	11-93
11.6.4.2	Field Study	11-94
11.6.4.3	Flow Models	11-96
11.6.4.4	Analysis	11-96
11.6.5	Results	11-97
11.6.5.1	Baseline Conditions	11-97
11.6.5.2	Groundwater Regime Predictions	11-97
11.6.6	Potential Implications of Groundwater Regime Changes	11-98
11.6.7	Groundwater Use	11-99
11.6.8	Infrastructure and Land Use	11-99
11.6.9	Management of Potential Implications	11-99
11.6.10	Conclusions	11-100
11.7	Thermal and Ice Regime	11-102
11.7.1	Baseline Conditions	11-102
11.7.1.1	Baseline Thermal Regime	11-102
11.7.1.2	Baseline Ice Regime	11-104
11.7.1.3	Timing of Ice Formation and Breakup	11-106
11.7.2	Thermal and Ice Regime During Construction	11-107
11.7.2.1	Construction Stage 1 – Approach and Expected Changes	11-107

11.7.2.2	Construction Stage 2 – Approach and Expected Changes	11-107
11.7.3	Thermal and Ice Regime During Operation	11-108
11.7.3.1	Approach and Methods.....	11-108
11.7.3.2	Model Validation, Sensitivity and Uncertainty.....	11-110
11.7.3.3	Expected Changes.....	11-112
11.7.3.3.1	Expected Thermal Regime in the Site C Reservoir	11-112
11.7.3.3.2	Expected Thermal Regime at the Site C Dam Outlet	11-113
11.7.3.3.3	Expected Thermal Regime in the Peace River Downstream of the Site C Dam	11-113
11.7.3.3.4	Expected Ice Regime in the Site C Reservoir.....	11-114
11.7.3.3.5	Expected Ice Regime in the Peace River Downstream of the Site C Dam.....	11-114
11.7.3.3.6	Ice Bridge and Ferry Crossing at Shaftesbury.....	11-116
11.7.3.3.7	Freeze-up and Breakup Water Levels	11-117
11.7.3.4	Climate Change	11-118
11.7.3.4.1	Thermal Regime with Climate Change	11-118
11.7.3.4.2	Ice Regime with Climate Change.....	11-119
11.7.4	Summary of Expected Changes	11-120
11.8	Fluvial Geomorphology and Sediment Transport Regime	11-122
11.8.1	Background	11-122
11.8.2	Technical Study Areas	11-122
11.8.3	Baseline Conditions.....	11-123
11.8.3.1	River Definition.....	11-123
11.8.3.2	Suspended Sediment Transport.....	11-124
11.8.3.3	Suspended Sediment Grain Size.....	11-126
11.8.3.4	Lateral Mixing of Tributary Sediment Inputs	11-127
11.8.3.5	Bed Material Grain Size	11-127
11.8.3.6	Bed Material Mobility.....	11-128
11.8.3.7	Historical Erosion and Deposition Patterns	11-129
11.8.4	Construction	11-129
11.8.4.1	Suspended Sediment Regime Downstream of the Site C Dam Site.....	11-129
11.8.5	Operation.....	11-135
11.8.5.1	Suspended Sediment Dynamics in the Reservoir	11-135
11.8.5.2	Suspended Sediment Regime Downstream of the Site C Dam Site.....	11-140
11.8.5.3	Channel Erosion and Deposition Patterns Downstream of the Site C Dam Site.....	11-142
11.8.6	Summary of Expected Changes	11-143
11.8.7	Climate Change.....	11-145
11.9	Methylmercury	11-147
11.9.1	Objective and Section Structure.....	11-147
11.9.2	Mercury Terminology.....	11-148
11.9.3	Reservoir Formation and Methylmercury Dynamics	11-148
11.9.4	Technical Study Area	11-149
11.9.5	Site-Specific Factors Relevant for Predicting Changes in Fish Methylmercury Concentration	11-150
11.9.5.1	Baseline Terrestrial Media	11-151
11.9.5.2	Baseline Aquatic Media	11-151
11.9.5.2.1	Water Chemistry and Mercury	11-152
11.9.5.2.2	Sediment.....	11-153
11.9.5.2.3	Aquatic Invertebrates	11-153
11.9.5.2.4	Fish.....	11-154
11.9.6	Predicting Changes in Fish Mercury Concentrations at Site C	11-158
11.9.6.1	Harris-Hutchinson Regression Model.....	11-158

11.9.6.2	Summary of Findings from RESMERC.....	11-159
11.9.6.3	Findings of the Canadian Reservoirs Comparison Matrix	11-162
11.9.7	Predicted Changes in Fish Methylmercury Concentration Within the Site C Technical Study Area	11-166
11.9.7.1	Site C Reservoir	11-166
11.9.7.2	Downstream Changes to Fish Mercury	11-168
11.9.7.3	Timing of Return to Baseline	11-169
11.10	Microclimate.....	11-171
11.10.1	Introduction.....	11-171
11.10.2	Methodology.....	11-171
11.10.3	Baseline Climate	11-174
11.10.3.1	Weather Research and Forecasting (WRF) Model	11-177
11.10.4	Statistical Significance of Model Predictions.....	11-179
11.10.5	Weather Research and Forecasting Model Performance Evaluation	11-179
11.10.6	Predicted Changes to Microclimate	11-180
11.10.7	Temperature	11-180
11.10.8	Wind Speed.....	11-180
11.10.9	Mixing Ratio.....	11-182
11.10.10	Precipitation.....	11-183
11.10.11	Fog and Visibility	11-184
11.10.12	Global Climate Change	11-186
11.11	Air Quality	11-187
11.11.1	Introduction.....	11-187
11.11.2	Objectives and Scope	11-187
11.11.3	Ambient Air Quality Criteria.....	11-187
11.11.4	Approach and Methods	11-189
11.11.4.1	Technical Study Areas.....	11-189
11.11.4.2	Field Surveys	11-190
11.11.4.3	Baseline Air Quality.....	11-190
11.11.4.4	Emission Estimation.....	11-191
11.11.4.5	Dispersion Modelling	11-192
11.11.4.6	Study Limitations.....	11-192
11.11.5	Baseline Air Quality Description.....	11-193
11.11.5.1	Baseline Emissions.....	11-193
11.11.5.2	Baseline Ambient Air Quality	11-194
11.11.6	Project Emissions.....	11-195
11.11.6.1	Construction.....	11-195
11.11.6.2	Operation and Maintenance	11-197
11.11.7	Dispersion Modelling Results	11-198
11.12	Noise and Vibration	11-201
11.12.1	Introduction.....	11-201
11.12.2	Methods.....	11-201
11.12.2.1	Approach.....	11-201
11.12.2.2	Technical Study Area.....	11-202
11.12.2.3	Criteria	11-202
11.12.2.4	Baseline Field Program	11-204
11.12.2.5	Prediction and Characterization.....	11-204
11.12.2.6	Data Quality and Prediction Uncertainty.....	11-206
11.12.3	Baseline Conditions.....	11-206
11.12.3.1	Measurement Survey.....	11-206
11.12.3.2	Baseline Summary.....	11-207
11.12.3.3	Baseline Traffic Noise Levels	11-207

11.12.4 Predicted Construction Noise Levels	11-208
11.12.4.1 Dam Site	11-208
11.12.4.2 Quarries and Pits	11-210
11.12.4.3 Clearing.....	11-210
11.12.4.4 Highway 29 Realignment.....	11-211
11.12.4.5 Transmission Line.....	11-212
11.12.4.6 Hudson’s Hope Shoreline Protection.....	11-212
11.12.5 Operation.....	11-213
11.12.5.1 Dam Site	11-213
11.12.5.2 Reservoir.....	11-213
11.12.5.3 Transmission Line.....	11-214
11.12.6 Summary of Predicted Changes	11-214
11.13 Electric and Magnetic Fields.....	11-215
11.13.1 Introduction.....	11-215
11.13.2 Baseline Conditions.....	11-215
11.13.3 Future Levels.....	11-216
11.13.4 Summary of Expected Changes	11-217
References	11-218
References for Section 11.1 – Previous Development	11-218
References for Section 11.2 – Geology, Terrain, and Soils.....	11-219
References for Section 11.3 – Land Status, Tenure, and Project Requirements	11-220
References for Section 11.4 – Surface Water Regime	11-220
References for Section 11.5 – Water Quality.....	11-220
References for Section 11.6 – Groundwater Regime	11-221
References for Section 11.7 – Thermal and Ice Regime	11-221
References for Section 11.8 – Fluvial Geomorphology and Sediment Transport Regime	11-222
References for Section 11.9 – Methylmercury.....	11-222

12 Fish and Fish Habitat	12-1
12.1 Approach	12-1
12.1.1 Regulatory and Policy Setting	12-1
12.1.2 Key Issues and Identification of Potential Effects	12-2
12.1.3 Standard Mitigation Measures and Effects Addressed	12-4
12.1.4 Selection of Key Indicators.....	12-5
12.1.5 Spatial and Temporal Boundaries.....	12-5
12.1.5.1 Spatial Boundaries.....	12-5
12.1.5.2 Temporal Boundaries	12-6
12.2 Information Sources and Methodology.....	12-6
12.2.1 Summary of Available Studies	12-7
12.2.2 Traditional Knowledge.....	12-8
12.3 Baseline Conditions	12-9
12.3.1 Fish Species	12-9
12.3.2 Fish Ecology	12-14

12.3.2.1	Coldwater Versus Coolwater Fish Groups	12-14
12.3.2.2	Small Versus Large Fish.....	12-25
12.3.2.3	Extended Versus Local Movements	12-25
12.3.2.4	Recruitment Sources – Natural Versus Entrainment.....	12-27
12.3.2.5	Habitat Use: Peace River Habitats versus Tributary Habitats.....	12-27
12.3.2.6	Habitat Use: Main Channel Habitats versus Side Channel Habitats.....	12-28
12.3.2.7	Fish Abundance and Distribution.....	12-28
12.3.2.8	Fish Age Structure	12-29
12.3.3	Fish Habitats	12-29
12.3.4	Environmental Factors	12-30
12.4	Effects Assessment	12-30
12.4.1	Effects Assessment – Construction – Change in Fish Habitat.....	12-32
12.4.1.1	Change in Habitat Due to Construction of the Dam and Generating Station, Highway 29, and Hudson’s Hope Shoreline Protection.....	12-32
12.4.1.2	Change in Habitat Due to the Construction Headpond and Reservoir Filling ..	12-34
12.4.2	Effects Assessment – Operations – Change in Fish Habitat	12-35
12.4.2.1	Transformation of Reservoir Habitat During Reservoir Operation.....	12-35
12.4.2.2	Downstream Habitat Changes.....	12-41
12.4.3	Effects Assessment – Construction – Fish Health and Survival	12-48
12.4.3.1	Changes in Fish Health and Survival Due to Sediment Inputs.....	12-49
12.4.3.2	Stranding of Fish.....	12-53
12.4.3.3	Fish Entrainment.....	12-53
12.4.3.4	Total Dissolved Gas.....	12-55
12.4.4	Effects Assessment – Operation – Change in Fish Health and Survival.....	12-58
12.4.4.1	Stranding of Fish.....	12-58
12.4.4.2	Fish Entrainment.....	12-59
12.4.4.3	Total Dissolved Gas Supersaturation	12-61
12.4.5	Effects Assessment – Construction – Change in Fish Movement.....	12-63
